

## MEMO

Date: October 13, 2016  
To: Contraction Standards Board  
From: Ted Bowers, Building Official  
Subject: Interpretation of moving permits; specifically regarding moving a new modular home into the City of Bastrop – Agenda Item #5

Staff is requesting the Construction Standards Board assist in interpreting if a new Modular home being constructed is included in the moving structures CUP requirement or excluded from the CUP requirement.

The reason staff is requesting an interpretation, is that a Modular home may be an exception, since a Modular Home is a new home following the International Building Code adopted by the City.

Previous discussions had pertained to older homes or buildings not meeting the present International Building Code as adopted by the City.

Your guidance and recommendations at the meeting will be greatly appreciated.
